Date: April 30, 2019

Dear Parent/Guardian,

District 4 Public Health has received NEGATIVE lab results for the suspected mumps case at Lee Middle School. There is no need for further action other than making sure your child has received two doses of measles, mumps, and rubella vaccine (MMR). Children usually receive the first MMR at 12-15 months and the second dose at 4-6 years of age. **If your child has received two doses of MMR, the risks of developing mumps is minimal.**

Sincerely,

Olugbenga Obasanjo, MD, MPH, PhD
District Health Director
