Dear Canongate Parents and Guardians,

We are excited that Canongate will be undergoing renovations this year! Construction will take place in three phases with Phase 1 tentatively scheduled to begin March 2017. Some of these school improvements include heating and air-conditioning; exterior renovations to doors and roof; upgraded security system, and upgrades to interior finishes in classrooms, restrooms and kitchen.

During this time, school will be in session with some classrooms being relocated to other classrooms throughout the building. If your child's classroom is impacted, the teacher will inform you of your child's room change. Safety and security for students and staff during construction will be our top priority. With that being said, please know that construction zones will be visually and physically secured. Administration will be working closely with the project manager to address any areas of concerns.

We will be committed to communicating with you regularly during construction. You will be updated about how construction activities will affect you and your students via newsletters, Canongate's website, TWITTER and REMIND.

As always, thank you for your continued support of Canongate Elementary. We hope you share our excitement for the great changes that will be happening here at the BEST SCHOOL IN THE COUNTY!

Sincerely,

Betty Robinson

Betty Robinson, Principal
